

SUMMARY

Software Engineer with 6+ years of experience in developing scalable web and mobile applications. Proficient in Java, Spring MVC, React.js, Node.js, and cloud technologies like AWS, with a strong focus on microservices, RESTful APIs, and serverless architecture. Expertise in implementing security protocols, optimizing system performance, and streamlining CI/CD pipelines. Skilled in Agile development and improving user experiences through real-time communication and seamless integrations. Proven track record of reducing latency, enhancing security, and increasing operational efficiency.

WORK EXPERIENCE

Sharemoney

Software Engineer

USA

Dec 2022 – Current

- Developed and maintained high-performance **web** and **mobile applications** using **Java** and **Spring MVC**, implementing **SOLID** principles, **Factory** and **Singleton Design Patterns**, and clean coding practices to ensure extensible and maintainable codebase.
- Architected and implemented **RESTful** and **SOAP APIs** using **OpenAPI** specifications, optimizing **microservices** communication with load balancing and rate limiting via **API Gateway** and improving reliability with circuit breaker patterns.
- Led the integration of a bill **payment system** within a **distributed microservices** architecture, implementing **Redis** for in-memory caching, which enhanced the platform's scalability and reduced latency by 30%.
- Enhanced user management workflows by implementing role-based access control (**RBAC**) with **JSON Web Tokens (JWT)** for secure authentication and **LDAP** for centralized **user management**, reducing support tickets by 20%.
- Created **modular, responsive UI components** using **Google Web Toolkit (GWT)**, **AJAX**, and **asynchronous JavaScript** to optimize **client-server communication**, improving performance and cross-browser compatibility.
- Integrated Onfido's identity **verification API** with **OAuth 2.0**, implementing a secure, **GDPR-compliant** document verification system that streamlined **KYC** (Know Your Customer) processes and enhanced platform security.
- Designed and developed an **administrative portal** for managing debit terminals and **kiosks** using **Kotlin**, **TypeScript**, and **Spring Boot**, employing **Thymeleaf** for dynamic **HTML** rendering and **Bootstrap** for responsive design, providing administrators with an intuitive control interface.
- Contributed to the development of a dynamic **React application**, leveraging **Redux** for **state management** and **Apollo Client** for efficient **GraphQL API** integration, optimizing data loading and reducing latency by 15%.
- Automated transaction reconciliation processes by implementing **ETL pipelines**, using **SQL** and **MongoDB queries** to **aggregate, validate, and generate reports** in real-time for audit compliance.

Infosys Limited

Software Engineer

Pune, India

May 2018 – Aug 2021

- Developed a high-traffic **e-commerce** platform leveraging **React.js**, **Java**, **Spring**, **Hibernate** (with **Redux** for state management) and **Node.js** on the backend, optimizing performance and responsiveness, increasing customer engagement and reducing page load times by 25%.
- Implemented real-time communication features using **WebSocket** with **Express.js** and **Socket.io**, enabling bidirectional messaging between users and support teams, improving real-time support capabilities and boosting customer satisfaction by 25%.
- Architected and deployed a serverless **microservices** architecture using **AWS Lambda**, **API Gateway**, and **DynamoDB**, significantly reducing operational costs by 20% while improving scalability and deployment flexibility.
- Led efforts in **database optimization**, leveraging **MongoDB** with **Mongoose** for efficient data storage and retrieval, incorporating indexing strategies and query optimization to improve performance by 30%.

Hexaware Technologies

Software Developer

India

Jan 2017 – Apr 2018

- Designed and developed an internal project management tool using **React.js** with **Redux** and **Spring Boot**, integrating **RESTful APIs** to streamline task management and enhance real-time updates, resulting in a 30% increase in project completion efficiency.
- Created an **automated testing framework** using **Python** for **cross-browser testing**, significantly reducing testing cycles by 70% and ensuring consistent quality across all major browsers.
- Developed a robust data analytics dashboard using **D3.js** for **dynamic data visualization**, empowering stakeholders to make data-driven decisions, improving reporting efficiency by 50%.
- Enhanced application security by implementing **OAuth 2.0** and **Spring Security** for secure **authentication** and **authorization**, reducing unauthorized access attempts by 40%.
- Integrated** third-party **payment gateways** (**STRIPE API**) for secure, **PCI-compliant transactions**, reducing payment failures by 15% through proactive error handling and system optimizations.
- Led the implementation of a **CI/CD pipeline** using **GitLab CI/CD**, automating unit tests, build processes, and deployment, reducing deployment-related issues by 30%.
- Engaged in **Agile development** practices, participating in **sprint planning**, daily stand-ups, and retrospectives, utilizing **JIRA** for project tracking, resulting in improved communication and efficiency across teams.

SKILLS

- Programming Languages:** Java, Python, Kotlin, C++, Dart, JavaScript (ES6+), TypeScript, SQL
- Front-End Technologies:** React.js, Angular, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery
- Back-End & Frameworks:** Node.js, Express.js, Spring Boot, Spring MVC, Hibernate, Django, RESTful APIs, GraphQL, SOAP, WebSocket
- Databases & Storage:** MySQL, PostgreSQL, SQL Server, MongoDB, Firebase, DynamoDB, Amazon S3
- Cloud & Hosting Platforms:** AWS (EC2, S3, Lambda, RDS, API Gateway, Amplify), Google Cloud Platform (GCP), Vercel
- DevOps & CI/CD:** Docker, Jenkins, GitLab CI/CD, Bamboo
- Version Control & Project Management:** Git (GitHub, GitLab, Bitbucket), JIRA, Confluence, Agile Methodologies
- Testing & QA Tools:** JUnit, Mockito, Mocha, Cypress, Postman
- Build & Automation Tools:** Maven, Gradle

EDUCATION

Master of Science in Computer Science	Aug 2020 – Dec 2022
California State University, Chico, USA	GPA 3.86
Bachelor of Engineering in Electronics Engineering	Jun 2013 – Apr 2017
Dwarkadas J Sanghvi COE, India	GPA 4.00
